

Tech Rider

I am only one person. And I need a fairly simple setup at stage. I arrive with essentially a laptop and a sound card + Midi controllers (usually 2-3) and a microphone. The things I need on stage, includes the following:

Lines

- Stereo Jack (to plug into my sound card)
- XLR cable for the microphone (will be for speaking mainly)

Monitors

- Stereo monitors if possible

Physical

- Power outlet / socket
- A microphone stand
- Tall stable table (90 – 120 cm) to stand behind (with room for laptop, mouse and midi controllers)

A subwoofer is essential for the right sound in the venue.

You can listen to the music on www.derrabe.dk (music player to the left)

I am looking very much forward to meet you and to play a great concert...

Please ask if anything is unclear
